SOFTWARE & MACHINE LEARNING ENGINEER

PROFESSIONAL SUMMARY

Performance-driven Software Engineer with 6+ years of experience building scalable backend systems, optimized storage engines, and containerized microservices. Recently retrained in AI/ML with academic focus on deep learning, NLP, and ML pipelines. Strong foundation in Python, C++, Docker, and Azure with proven ability to bridge software engineering and ML deployment workflows. Demonstrated expertise in both high-performance system design and applied machine learning. Available for full-time roles starting August 2025.

EDUCATION AND CERTIFICATIONS

Southern Alberta Institute of Technology (SAIT) - Calgary, AB, Canada

January 2025 – August 2025

Professional Certificate: Data Science

- Focused on Cloud ML Deployment, CI/CD, End-to-End Pipelines

Conestoga College – Waterloo, ON, Canada

January 2024 – August 2024

Graduate Certificate: Applied Artificial Intelligence and Machine Learning

GPA: 3.84 / 4.0

- Focused on supervised/unsupervised learning, reinforcement learning and ML libraries

Velammal Institute of Technology (Affiliated to Anna University) – Chennai, India

June 2013 – April 2017

Bachelor of Engineering: Computer Science

CGPA: 8.7/ 10.0

TECHNICAL SKILLS

Languages & Libraries: Python, C++, Java, SQL, Bash, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, R

Machine Learning: NLP, Deep Learning, CNNs, Model Evaluation, Feature Engineering

Backend & Systems: Columnar Storage Engines, REST APIs, Java Servlets, Multithreading, Filesystem Refactoring

Cloud & DevOps: Azure (ADF, SQL, Blob, App Services), Docker, CI/CD, Databricks, Delta Lake, Apache Spark

Tools & Platforms: Git, VSCode, JIRA, Intel VTune, Power BI, Grafana

Soft Skills: Technical Communication, Mentorship, Agile Development, Analytical Thinking

PROFESSIONAL EXPERIENCE

AI Content Editor | Outlier – Calgary, AB, Canada

Oct 2024 – Present

- Evaluated generative LLM outputs for accuracy, tone, and relevance.
- Applied NLP understanding to analyze model responses in real-world scenarios.
- Conducted feature-level error analysis to improve model behavior in STEM domains.

Software Developer | Zoho Corporation Pvt. Ltd. – Chennai, India

May 2017 – November 2023

- Engineered vectorized columnar storage system that improved BI query speed by 40%.
- Designed and containerized microservices using Java Servlets, Docker, and Flask.
- Developed multithreaded query execution pipelines using C++, reducing CPU contention.
- Built Bash-based observability tools for disk, memory, and performance monitoring.
- Mentored junior developers, contributed to compiler optimizations (SIMD, branch reduction), and scoped GPU feasibility for query acceleration.

RECENT PROJECTS

Skin Disease Detector and Tracker

- Developed a deep learning model using **TensorFlow** to classify 7+ common skin conditions.
- Built application using **Flask** and **SQLAlchemy**, with **PostgreSQL** as the backend database to store user data and prediction history.
- Enabled disease progression tracking via time-series overlays with dynamic visualization.

Tech: Python, TensorFlow, Flask, SQLAlchemy, PostgreSQL, Docker

Sentiment Analysis

- Real-time NLP engine using **scikit-learn**, **SVM**, and **TfidfVectorizer** for Reddit-based sentiment tracking.
- Included GUI frontend using **tkinter**, integrated live data collection via **PRAW**.

Tech: Python, scikit-learn, SVC, TfidfVectorizer, SentimentIntensityAnalyzer

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (In Progress)

Databricks Lakehouse Fundamentals (Planned)
